TFCO Needs Foster Parents

TFCO foster parents are unique. They are a highly valued part of a collaborative team and possess a passion for helping to change the lives of vulnerable children. Their work influences the strength and health of their communities. **Treatment program length: Only 9 months!**

According to a survey by the National Association of Social Workers, 80% of prisoners in Illinois spent time in foster care as children. **TFCO foster parents are working to change that.**

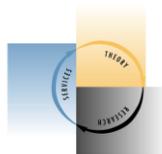

TFCO Program Description

TFCO is an evidence-based treatment practice that was developed in 1983 following extensive scientific research. TFC Consultants, Inc. was founded in 2002 to provide guidance, training, and technical assistance to new and existing TFCO programs.

TFCO Foster Parent Commitment

Youth live in a TFCO foster parent treatment home for approximately nine months. The homes receive initial and ongoing training, daily monitoring, weekly group support, and in-the-moment coaching. Youth in TFCO receive weekly support to navigate the program, practice problem-solving and coping skills, along with other skills individualized for their particular needs. Families participate in weekly services, which focus on coaching them through key techniques to regain confidence and effectiveness with their youth. A highly experienced TFCO Team Leader is available to foster parents 24/7 to allow for quick and effective support to situations and behaviors.

Connecticut officials estimate 75% of youths in the state's criminal justice system were once in foster care. **TFCO foster parents are working to change that.**

Only 9 months living with a TFCO foster parent could change a child's life forever!
